

REMARKS

Claims 41-47 are pending in this matter, all of which are allowed. Prosecution is closed. However, formal matters concerning the drawings are addressed herein.

The drawings are objected to. In particular, regarding FIG. 16, element 2111 was not connected to any feature, and there were two numerals 2000. At page 44, line 13 of the specification element 2200 was not shown in the drawings. These informalities have been addressed by adding a lead line to numeral 2111 showing the feature to which it is connected, and changing one of the numerals 2000 to 2200.

Additional changes are made as follows:

In FIG. 16 element 2252 has been changed to 2232. The connected feature is a wire lead as identified at page 45 line 14 of the specification as 2232.

In FIG. 17A the conductive contact electrode 2211 (see, page 44, lines 14-18 of the specification) had been erroneously numbered as 2210. This is corrected by amendment herein.

In FIG. 19, the feature to which numeral 2121 is connected, i.e., a conductive electrode film, is added by amendment.

Appln. No. 10/760,655
Amendment dated August 27, 2004
Reply to the Office Action of June 30, 2004

CONCLUSION

For at least the reasons stated above, the present application is submitted to be in condition for allowance, the same being respectfully requested.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Adrian T. Calderone", written in a cursive style.
